

## 2013 OMS Pen Glen Summer Foray species list

compiled by David Miller & Jerry Pepera

### Ascomycetes

Crucibulum laeve  
C. sterocoreus  
Cyathus striatus  
Scleroderma areolatum  
S. citrinum  
Calocera acornea  
Clavulinopsis fusiformis  
Ramaria sp.  
Tremellodendron pallida  
Gymnosporangium juniper- virgineana  
(a rust parasite with spectacular orange fruiting pustules on apple leaves. Spectacular because its alternate host [juniper] was growing adjacent to it, facilitating transfer of infectious disease spores! A similar sighting was made at Dawes, not long ago, but they, being an Arboretum, should definitely have known better than to grow this plant parasite's two hosts in such close proximity! I'll give the Pen Glen folks a pass on this one!)  
Galiella rufa  
Helvella sulcata  
Hypomyces chrysospermum  
H. hyalinus  
H. luteovirens  
H. melanocarpus on Tylopilus  
Hypoxyton fragiforme  
Trichoglossum sp.  
Xylaria polymorpha

### Agarics

Amanita bisporigera  
A. brunnescens  
A. flavoconia  
A. flavorubens  
A. rubescens  
Cantharellus appalachiensis  
C. cibarius  
C. lateritus  
C. minor  
Clitocybe gibba  
C. sp.  
Gymnopus sermihiripes  
G. subnudus  
Hohenbuehelia sp.  
Hygrocybe cantharellus  
H. marginata var. marginata  
H. sp.  
Hymenopellis furfuracea  
Inocybe tahaquemenonensis  
Laccaria laccata  
Lactarius piperatus  
L. psammicola  
Marasmiellus praeacutus  
Marasmius praecutus ?  
Megacollybia rodmani  
Pleurotus pulmonarius  
Russula compacta  
R. earlii  
R. eccentric  
R. mariae  
R. ochroleucoides  
R. variata  
R. sp.  
Tapinella panuoides

### Boletes

Boletus bicolor  
B. frostii  
B. hortonii  
B. longicurvipes  
B. sensibilis  
2 B. sp.  
B. subvelutipes  
Gyroporus castaneus  
Leccinum albellum  
L. griseum  
L. sp.  
Phylloporus leucomycelinum  
P. rhodoxanthus  
Retiboletus griseum  
R. ornatipes  
Strobilomyces sp.  
Suillus granulatus  
S. subaureus  
Tylopilus alboater  
T. felleus  
T. intermedius  
T. plumbeoviolaceus  
T. rubrobrunneus  
Xanthoconium affine  
X. separans

### Polypores

Abortiporus biennis  
Coltrichia cinnamomeus  
Fomitopsis spraguei  
Ganoderma applanatum  
Lenzites elegans  
Nigroporus vinosus  
Phellinus gilvus  
Polyporus alveolaris  
P. leptcephalus  
P. sp.  
Stereum ostrea  
Trametes versicolor  
Trichaptum bifforme  
Tyromyces chioneus  
T. fragilis
